PROFESSIONAL SUMMARY

React Native Engineer with 3+ years of experience building scalable cross-platform apps. Expert in React Native/React, UI architecture, and performance optimization. Skilled in secure coding in both class/functional components

SKILLS

Languages: JavaScript, TypeScript

Technologies and tools: React Native, React, Redux, Jest, Git, Github, GitLab, Jest-Cucumber, CICD, Node.js, express.js, SQLite, MongoDB

WORK EXPERIENCE

React-Native Developer, Wovvtech - Remote

March 2023 to May 2025

LovePet(Builder.ai)

- Designed a complex image gallery with a carousel feature, optimized image upload and rendering time, and reduced 12% network latency to improve performance
- Designed and developed a comprehensive scheduling system for pet services, including hotel, training, grooming, pet sitting, dog walking, and daycare for pet owners. Additionally, I developed a customized calendar UI that allows vendors to view all bookings

AI-Self Drive(Builder.ai)

- Developed an AI-powered search feature for car rentals and hotel bookings, helping users find vehicles and accommodations for tours
- Designed and developed a feature for hotel and car service providers to view upcoming, past, and current bookings, with advanced sorting, search, and filter options.

Frontend Developer, Freelancing - Remote

February 2022 to January 2023

- Designed and developed responsive UIs for mobile and web applications, integrated RESTful APIs for data binding, and managed state with Redux-Thunk, debugged and resolved issues through advanced debugging tools
- Collaborated in 20+ pair programming sessions to develop and review code, driving high-quality implementations and delivering efficient solutions with improved code coverage and performance

React-Native Intern, Taxmann Technology - Remote

October 2021 to January 2022

- Contributed to the React Native development team, designing and implementing UI components for the Taxmann Store mobile application, enhancing the user experience for over 10K active users
- Utilized advanced debugging techniques to identify and resolve critical bugs, improving app stability and performance by 19%

PROJECTS

Expense AI Agent

[Github Repo](#)

Build AI Agent using LLM llama-3.1-8b-instant using groq and added three tool which are responsible for total expenses, total income and every single expenses

AI Chat Application

[Repo Link](#)

Developed AI Chat application using React Native Expo, Expo Router, Expo API route, Zustand and integrated Open AI

EDUCATION

Bachelor of Engineering in Computer Science(B.E. - C.S.E)

Chandigarh University

2015 - 2019

CERTIFICATIONS

CCNA first level
